

Task

Create a Spring REST Service for the following requirement:

Send the following JSON Request to the Spring REST Service and print content to the console output.

```
{
  "employee": {
    "firstname": "Max",
    "lastname": "Mustermann",
    "address": {
      "street": "Teststrasse",
      "streetnumber": "1",
      "zip": "12345"
    }
  }
}
```

Output:

1. print the result to the console output or create a JSON response
e.g.: comma-separated Key-Value-Pairs

Output: Employee [firstname=Max, lastname=Mustermann, address=address [street=Teststrasse, streetnumber=1, zip=12345]]
